The Housing Development Corporation Addresses Water Quality Complaint in Apartment 103, Powder Magazine, Phase 1

Port of Spain, Monday, 24 July, 2023

The Trinidad and Tobago Housing Development (HDC) has now become aware today Monday 24th July 2023, of water quality issues affecting resident of Apartment 103, Powder Magazine, Phase 1. Several checks by the HDC has determined that this has not occurred at any other apartment in the building to date.

In **2022** the HDC's Management paid visits on several occasions over 2022 to rectify all issues regarding the water quality at Apt 103 for which the HDC: repaired the 4" Waste line (Sewer), replaced 1 ½" PVC Lock Off valve in ducting - both internal and external valves were replaced to ensure proper water flow, replaced 1 ½" Pressure Waterline - from outside the compound to the ducting

Further, our team of Foremen and Plumbers on November 27th 2022, conducted thorough site visits to assess and address the issue and investigations revealed, the water discoloration was linked to scheduled maintenance work carried out by the Water and Sewage Authority (WASA), confirming the water not being contaminated.

The Housing Development Corporation (HDC) takes the well-being and satisfaction of its tenants seriously. We are committed to ensuring that all residents of our properties experience a comfortable and safe living environment

In demonstrating our commitment to address concerns, the HDC will continue to conduct further investigative work to rectify this issue and maintain the highest standards of service for our valued residents.
