

## **Sewer Issues at Gomez Trace, Phase 1, Moruga**

March, 1, 2024

The Trinidad and Tobago Housing Development Corporation (HDC) is currently addressing the sewer leakage reported at Gomez Trace, Moruga, Phase 1. Our team is fully engaged in resolving this issue promptly.

The HDC maintenance team is in the process of rectifying the clogged lines. Post-maintenance, comprehensive cleaning, and sanitisation will be conducted to ensure the area is restored to a pristine state.

We estimate the completion of these works by the end of today, after which residents will regain the complete functionality of their systems. The HDC would like to take this opportunity to remind the community to avoid disposing of non-compliant items in the toilets. The sewer system is designed to handle specific materials such as water, toilet paper, and human waste exclusively.

We apologise for any inconvenience this situation may have caused to the residents of Phase 1 Moruga and thank you for your patience and understanding.

End
